This is from a file that I am downloading from a remote server. I don't think I can load the file in the SDCard from other files? I am doing the following... ImageView img; Bitmap bmp; String filename = "test.jpg"; File myFile = new File(Environment.getExternalStorageDirectory() + File.separator + "/test.jpg"); InputStream is = null; try { is = new FileInputStream(myFile); } catch (FileNotFoundException e) { e.printStackTrace(); } bmp = BitmapFactory.decodeStream(is); Can someone please tell me how to get the file content so that I can add it to a ImageView so that it is displayed on screen. I thought I needed to save it to a temporary file and get the content from the temporary file for display. Thanks. A: You can do this way 3e33713323
