
ZGuideTV.NET Activator (April-2022)

The new version of ZGuideTV.NET has been redesigned from scratch to make it more user-friendly and easier to use. The program allows you to find TV shows, movies, and other TV-related information, including those from Internet TV, IPTV, and satellite broadcasts. ZGuideTV.NET is a universal tool which supports all major platforms including Microsoft Windows, Mac OS X, and Linux. The program displays TV listings for your local region, and also lets you automatically update for next week and the entire week. Additionally, it provides a huge library of TV shows, movies, and other TV-related information. User interface The program's user interface is very simple and intuitive. It lists all the currently available information from all the TV channels, movies, and TV shows in one convenient and spacious view. The program lets you filter results by channel, genre, and category. It even offers separate lists for week and month updates. Advanced searches and other handy features ZGuideTV.NET supports an advanced search function, which allows you to search for the information by title, author, year, genre, or even channel. Additionally, the program features a comprehensive set of configuration parameters that can be used to tweak the program's appearance and settings. Rich set of configuration settings The tool provides a rich set of configuration parameters, which can be accessed from the main settings section, and include TV listings, channels, movie information, server settings, link updates, user settings, and logos. Backup, restore, and print functions ZGuideTV.NET provides a comprehensive backup function, which allows you to copy and restore all the program's data, including database, channel list, link updates, and other information. It also lets you print all the program's info. Overall efficient electronic TV magazine All in all, ZGuideTV.NET is a handy utility which comes with a big set of features for checking out the TV listings. It's certainly a worthy option for the to-be-found list. ZGuideTV.NET Description: The new version of ZGuideTV.NET has been redesigned from scratch to make it more user-friendly and easier to use. The program allows you to find TV shows, movies, and other TV-related information, including those from Internet TV, IPTV, and satellite broadcasts. ZGuideTV.NET is a universal tool which supports all major platforms including Microsoft Windows, Mac OS X

What's New in the?

"ZGuideTV.NET" is an easy-to-use electronic magazine for the TV lovers. It allows you to stay updated and watch TV shows of the day and next week. It also provides filtering options for ZGuideTV.NET description ZGuideTV.NET is a software application which works as an electronic TV magazine. It offers quick access to today's and next week's TV listings. User interface The GUI may seem a bit crowded at a first glance but this is only because the program reveals the TV shows, movies and other options for multiple TV channels, just like you'd be reading the information in a dedicated magazine. The utility also integrates a dedicated time bar, so you can easily spot the TV shows at your preferred hour of the day. Additionally, it offers filters for helping you list the information by a certain day or hour, and lets you show or hide calendar, descriptions and categories. Advanced searches and other handy features The tool allows you to make use of an advanced search tool, as you may look for data by different criteria (e.g. title and subject, author/actor). It displays info about the channel, TV show, start and end date and time, as well as category. Rich set of configuration settings ZGuideTV.NET comes packed with several tweaking parameters designed to help you purge files, enable fade out effects, select the desired hardware configuration (normal, average or small), show tool tips, set up proxy parameters, automatically update data for XMLTV files, automatically resume for a preset time, as well as enable audio alerts for RSS updates, alert messages, and reminder messages. What's more, the program lets you back up database, channel list, link updates, user configuration and logos, and easily restore them in case you experience problems. The information can also be printed. An overall efficient electronic TV magazine All in all, ZGuideTV.NET comes with a handy suite of features for helping you check out the TV listings, and is suitable for rookies and professionals alike.
