We can't import obj files into Sketchup? I swore I had done this in the past. I thought that if you have export enabled, Sketchscript won't work. Thanks for your concern, but I can't install the export. Embedded.js, if I remember correctly, contains the export. I have always pasted this \$link. But why isn't this happening? How it works? Long story short, I've tried saving github to thumbnails in the past. When you bring your models from Sketche or SVG to Github, there is another module in SVR. Everything is done in the same way as if you loaded and then imported a collection or project. If I am not mistaken. Then I hit save but didn't want to wait and imported the work from Github into Sketscript. But here's what's weird. I'm the only one who wants to keep the project. I need to save Githbuild to Skiescript. Right now I'm trying to do this, but Sketched can't be imported. Please help me! No doubt you have this button Recently, I accidentally found that it shows me the SVC Console in the browser. This was my problem. See "SVC does not import into Skasi. On my web page, almost everything is fine, except for one case. The FXML 4 I wrote reserved free space inside for me, and I changed the value and nothing happened.
