The jaunty and funny Pepe Porcupine is not a grand wizard at moving crates, but he's got the right paw for the job. He loves to play soccer and climb mountains, and that's just the beginning! He works in a distant warehouse but loves to have fun and trick the humans every now and then. Enjoy this unique puzzle experience with Pepe Porcupine! Hi peeps, It's time for another episode of "Pepe's Funniest Games" on YouTube. This week, we're playing Toki and Go! Toki and Go! is a game where you need to slide Toki to the edge of the board, which are the blocks. Once you have Toki to the edge, you can remove a block to make a path. Once you have a path, you can move your tiles. As you move your tiles, the goal is to make a path from the start to the end and get the most points. So now it's time to play with Pepe Porcupine! The jaunty and funny Pepe Porcupine is not a grand wizard at moving crates, but he's got the right paw for the job. He loves to play soccer and climb mountains, and that's just the beginning! He works in a distant warehouse but loves to have fun and trick the humans every now and then. Enjoy this unique puzzle experience with Pepe Porcupine! Game information Pepe Porcupine works the nightshift in a warehouse and needs your help! Each night his job is to move crates into position in a confined area with the least amount of work. Inspired by the Japanese game of Sokoban, which is a transport puzzle, in which boxes or crates are pushed about in a warehouse, your task is to correctly position crates with the least amount of pushes and moves. Played from a top-down perspective on a board of squares, crates can be shifted horizontally or vertically into empty squares, but never through walls or obstacles. Crates cannot be pulled, adding to the fun, and unless you help Pepe complete all 254 puzzles, he'll be stuck at the warehouse forever!Key Features: 254 mind-bending puzzle challenges Undo-feature when you make mistakes "Head Scratcher" mode and "Head Banger" mode! Great graphics and fun animations About The Game Pepe Porcupine:

Blockville [Win/Mac]

This pack is intended to offer a major improvement to the default FSX terrain mesh used in FSX: Steam Edition and in its companion app, FlightSimX World Tour (FSXWT). The Middle East terrain mesh has been improved to enhance the visual appearance of the region and to bring it more in line with where it should be according to real world topography. The Middle East terrain mesh is the result of combining the FSX default terrain mesh with topography data from a combination of ground, aerial and space-based topographic data. This collaborative effort has greatly enhanced the level of detail of the Middle East mesh and has presented a marked improvement to the landscape profile. The Middle East mesh combines terrain from two separate ground layers: • A default ground layer that contains a variety of built-up areas with underlying ground detail, together with some built-up areas from a satellite image • A water/land space layer that has been stretched to provide ground and open water at higher LODs A further layer of detail is added by combining the results from the default and water/land space layers together to create a Single-LOD terrain mesh. This terrain mesh is then used by FSX: Steam Edition's companion app, FSX: World Tour, to enhance aerial perspectives of the region. Features of the Middle East mesh: • New LOD terrain mesh and accompanying app for use in FSX: Steam Edition and FSX: World Tour • Improved topography for enhanced overall visual appearance of the region • Improved ground model that will make flying around the Middle East region more realistic At higher LODs, the terrain mesh provides LOD 11 / 19m of accurate ground detail. • Improved overall appearance of the region • Improved landscape profile with subtle undulations for enhanced image quality and realism Special thanks: • Alan Roscoe (SWSC) for contributing some of the terrain detail for the Middle East mesh. • Jörg Zimmerman for providing a base mesh for the Middle East region • Steve Theibert (thewetstick) for contributing a layer of detail to some of the built-up areas of the Middle East mesh • Richard Wollheim for his excellent and comprehensive aerial photography. • Jim Black for the DigitalGlobe satellite imagery. What's new:

In 2006 I took my small child to my cousin's house in Kentucky. I had been to this house many times in the past, and knew how to find the freezer. But this was my first visit to a place where beer wasn't just the beverage served at state dinners, but a commodity in the pantry. (I went with my cousin because her children agreed to come with me. I'm going to go to the trouble of explaining why—read on.) It was late fall, maybe late fall, I'm not sure because I was always prompt back in school, and that probably tells me something about my memory. Anyway, I took my child through the house, past the thousand-year-old family Bible, past the lush green plantations that were beginning to fade, past the red clay and slate barns. And there it was. All the varieties were on display in the single cool room under the kitchen, alongside the other products of that fertile bottomland land. Or perhaps I should say that I was the corralling party, forcing my child, who was practically deaf, into a field of beer, forcing her to sniff the smell of old malt. That was kind of what I did that day—I'm a domestic educator. When I was growing up, our Sunday School teachers mostly told us to honor our parents and keep our bedrooms clean, and they encouraged us to enjoy TV, radio, and the big, bad movies. Then, moving on to teenagers, they informed us about sex and drugs, but they also encouraged us to continue making Sunday school plates. Did we really need the threat of Jesus hanging over our pillow while we slept? I can't help but wonder what it would have been like if they'd stressed how much Jesus approved of beer, or more likely, malt. What was it really like in those days? The tap room and cellar were in a field, which was presumably marsh. Was it marsh beer that was consumed? Or was it a relic, the remnant of a less desirable product more fit for rendering into duck oil? I'm not sure. But I do know about what I saw that day. Mostly I saw that strange example of purity, the barrel—a place designed, as they must have been, for the safe holding of drinks that have come from the Devil himself. What was it, though? What was this brew that was in our wells
