_____ #18. Dungeons of
Dagoth – PC & MAC PPSSPP Dungeons of Dagoth. A Dungeon
crawler RPG created in RPG Maker. Simple, simple, but full
of great fun, lots of great assets, this game captures the
1980s feel of Dungeons and Dragons, while offering something
unique. You'll run, loot, create a party, and fight using a
pure turn based game system with a multitude of skills. At
its core, this game is about characters you build, equipment
you choose, and how you interact. You can play solo, or in
duo or group. There are six classes to choose from, each
with their own set of abilities and weapons. They are:
Warrior, Rogue, Mage, Thief, Cleric, and Fighter. Right now
the game offers five hundred floors of pure dungeon
crawling, each floor is a new dungeon that gets gradually
harder. As you go through the game, you'll need to have at
least some self defense, and there are heaps of great
heroes, monsters and loot to collect! You'll be able to form
teams of three, which can be switched at any time, so don't
worry if one person sucks at a skill, you can change them.
You also have the ability to switch weapons and armor at any
time. The different classes also have different ways of
equipment using your level, so it's worth it to think about
what you want to do with your character and try out
different classes, as this game isn't simply a classless
RPG. The game will offer a basic tutorial so you can learn
the basics of the game, and even a customisable scenario
creator so you can make your own challenges for yourself.
There are now over two hundred thousand words of original
story material available to be discovered. There are also
pictures in the game, and even an animation gallery. Play
the game in your browser at www.dod.co.uk You can get a
