Synopsis of Elden Ring

The Lands Between, an interdimensional space created by the large earthquake of five years ago, have been expanding year by year and now has encroached upon other dimensions....

Every dimension has a unique atmosphere. The Wells are an uninteresting land that can only communicate with people like the master, the village, the establishment, and adventure, but are completely different from other inhabitants. People here refer to these dimensions as the "Sneerson" but to those outside who are aware of the Lands Between, they are merely a land "Twinkser." The more the twink updates, the more the Lands Between is expanding.

There are many different inhabitants, including different races of humans, elves, and dwarves. There are also monsters, ferocious and dangerous creatures whose appearance has always been restricted and most people wish to keep safe. The monsters, who refuse to obey the law of the Lands Between, do not worry about people anymore. You said that someone in the Lands Between can meet someone like him, the one called the "Lord," and obtain help. Even if you don't have allies, you can travel with the strength of a newly raised nation. The one who has come to find you is a hero!
