Currently, a user in a low-traffic environment utilizes a mobile communication terminal having a multimedia function to capture images and perform communication using pictures. Also, various mobile communication terminals provided with a camera function are increasing in number. Recently, an image sharing service has been developed. That is, an image communication service using the mobile communication terminals is widely provided to users through a network. An image sharing service is a service for transmitting and sharing images using a network. Thus, users can share images as picture information within the limit of the service. The user can perform network communication using the services provided to the mobile communication terminal having the camera function. Especially, the user can perform communication using the mobile communication terminal having the camera function that can also transmit images in the state that a message is displayed on a display, or in the state that a voice communication is performed. A high level of interleukin-1 is associated with high mobility group box protein-1 expression in gastric cancer. Based on the effect of interleukin-1 (IL-1) on the expression of high mobility group box protein-1 (HM 6d1f23a050
