I know it's not exactly what you asked, but thought it could be helpful for anyone searching for the same thing. I hope this helped, and good luck! Feel free to comment if anything was unclear. A: I am going to guess you've already purchased this lift pump, and it doesn't have a working motor, so you are looking for technical information to help you figure out how it works. (I will refer to it as the lift pump). Each JCB brand has a VIN numbering system of some sort, just as each makes different equipment of the same type. The VIN number tells you the make, model and year of the equipment, but it doesn't tell you the serial number. Each machine manufacturer does it differently, and will have different codes for all equipment, engine, etc... It is possible that a

serial number only exists for your pump and that its serial number will not match the VIN number. The pump number will tell you which manufacturer it is. Manufacturer - G1J Model - DF6P0814 Function - Fuel Lift Pump Serial Number - 17/913600 [Prevalence and seasonality of hydatid disease of sheep in Tunisia]. Hydatidosis is the most common of the parasitic diseases affecting domestic animals; it is also the most dangerous of those that have a serious impact on human and animal health. The prevalence rate has not yet been well defined in Tunisia. The goal of this study was to evaluate the prevalence rate and the temporal distribution of hydatidosis in sheep. Three areas were selected from the three major zones in Tunisia: the North (n=20), the Centre (n=20) and the South (n=20). The breed of the sheep was specified for each region. Stained fecal samples were collected from 42 sheep farms and individual rectal palpation was done at each farm to detect cysts. The total positive rate was 6.02% (95% CI=4.09-8.05). The prevalence was higher in the North, with a rate of 2.94% (95%CI=1.48-4.41), than in the Centre, with a rate of 3.88% (95%CI=0.75-6.98), and in the South, with a rate of 5.14% (95%CI=1.51-8.76). 6d1f23a050
