## Return To Base Korean Movie Torrent Download

All torrents from 4shared from 3919892 .  
The new " and more easily controlled. This  
new flowchart will explain how to avoid  
crossing over.. Rhino base editors are  
integrated into the Rhino model, which  
makes model building easy and accurate.Q:  
Python socket programming, problems when  
connecting to localhost I'm really struggling  
to understand socket programming in python  
(3.x). Below is a snippet from my attempt to  
write a simple server, which I'm attempting  
to test via the python library smtpd(3.x):

```
#!/usr/bin/env python3 # we will listen on  
port 25 (for SMTP connections) HOST =  
"127.0.0.1" PORT = 25 def listener(): #  
    create a TCP server socket s =  
    socket.socket(socket.AF_INET,  
socket.SOCK_STREAM) # bind it to the port  
s.bind((HOST, PORT)) # keep it running  
s.listen(5) # now we just wait for a  
connection (client, (HOST, PORT)) =  
s.accept() # when the connection comes, we  
print out some information and send some
```

---

data back to the client. print("a client connected.") print("client's host name: %s" % client.getpeername()) print("client's port number: %d" % client.getsockname()) data = 'hello world!' client.send(data) # close the connection client.close() if \_\_name\_\_ == '\_\_main\_\_': listener() When I run the code with python3, I get the error: socket.error: [Errno 98] Address already in use. I had previously thought that it was something to do with the fact that HOST = "127.0.0.1" - however I have tested the code working on an external SMTP server, so I have no idea what I'm doing wrong (I would think that 127.0.0.1 would be localhost). 6d1f23a050
