I'm studying mathematics courses at a reputable university in the USA. While mostly I'm studying applied math such as linear algebra and multivariable calculus and some basic mechanics, I'm also being exposed to some fluid mechanics courses. I'm thinking about what I should do, to combine my math knowledge and fluid mechanics knowledge. Which course should I take? One of the reasons I'm considering fluid mechanics is that they look more interesting than other applied math courses. A: I would recommend taking the fluid mechanics course first, because it will (arguably) be less trouble for you to learn on your own. If you're not satisfied, then you can always major in Applied Math. Alternatively, if you want to focus on fluid mechanics, you can switch to a different major. In any case, I'd recommend taking a look at this list of online fluid mechanics courses: Turbulence and Statistics (University of Cambridge) Department of Engineering and Applied Mathematics (Princeton University) Centre for the Mathematics of Fluid Mechanics (University
